Subj: Thanks!

Rick,

I wanted to take a few moments here and express to you and Todd Sillars how much I appreciated his recent journey into the Canadian Rockies with regard to the Copper Point Resort project.

His on site presence was immediately appreciated by the G.C. and other trades as there were some significant site conditions that were done incorrectly and would have had the word "failure" attached to them had he not identified them and offered practical solutions. Now there will be success in this area and truly I need to give credit where credit is due. The partnership that we've developed has certainly paid dividends in the eyes of those we encountered while on site at this project. The level of attention, detail and collaboration that I was able to give Copper Point Resort by having Todd present was far beyond what I would have otherwise been able to do on my own. Since I was the one who specified having Imperial Mfg be the box maker, I felt that we needed to make a big, positive impact. Which I'm now confident that we did!

I have a deep appreciation for Todd's commitment to assisting me and my customer's goals when it comes to specifying, quoting, site management and customer service follow through for the products that Imperial puts out there.

Thanks!

Karl
